

T5 NECKBAND

Klipsch®

Ideal for the commuter, the T5 Neckband offers best-in-class comfort, all-day battery life, dual-microphones and clarity for whatever your schedule demands.

LEGENDARY SOUND + GREAT FIT

After 60+ years of making legendary loudspeakers, we built upon our bold audio heritage to revolutionize the headphone industry. Since 2007 we have been creating the most innovative headphones on the market. We are the performance and comfort winners. Period.

The same advanced acoustic engineering and industrial design from our legendary home theater speakers provide the performance, voice and design for the T5 Series earphones. They are engineered for pure performance and designed to be the best sounding most comfortable headphones on Earth and the embodiment of legendary Klipsch sound.

PATENTED OVAL EAR TIPS

Klipsch in-ear monitors utilize patented contour ear tips that are designed to accurately sit inside the ear canal. These soft oval silicon tips reduce ear fatigue, provide the ultimate comfort and an excellent seal for noise isolation and superior bass. They fit better, they feel better, and only Klipsch has them.

FORM MEETS FUNCTION

Crafted with high quality materials, the T5 Neckband stands apart from the competition. With hand-stitched edge-treated leather, the T5 Neckband rests comfortably against your skin. Meant to age, not wear out, the genuine materials combine with minimal shape to sit either directly on your neck or tuck under the collar of your shirt.

FULL BASS, DYNAMIC DRIVER

Engineered from the ground up to deliver powerful performances from the smallest package, the T5 Neckband's dynamic driver combines high output and full bass extension. Ensuring deeper fit and better hold, the smaller acoustic modules are designed to stay in your ears securely and comfortably.

15-HOUR BATTERY

The T5 Neckband use a single lithium ion battery to deliver over fifteen hours of listening to music and taking calls. The integrated cVc® dual-microphones automatically enhance voice clarity and actively reduce environmental noise to ensure your calls are loud and clear.

BUILT-IN NECK VIBRATION

The built-in neck vibration feature will vibrate to notify you of incoming calls. Pick the call up directly from the right control pod and take your call using the built-in microphones.

BLUETOOTH 5

With aptX and aptX HD, the signal is as good as wired with no delay during video playback. Supporting 48 kHz / 24bit LPCM audio, aptX HD is indistinguishable from high resolution audio. The T5 Neckband also supports multi-point pairing, so you can pair two devices at once.

ADVANCED THREE-BUTTON REMOTE

Offers full control of most smartphone models including Android and Apple devices, allowing for seamless control of music and phone calls. The raised controls let you pick up calls, adjust volume, and track through songs.

SWEAT/WATER RESISTANT

IPX4 rated meaning these earphones will withstand the elements.

KLIPSCH CONNECT APP

The Klipsch Connect App adds extra features and lets you personalize your experience. Stay on top of your battery level, EQ settings, firmware upgrades and more. Available for download on iPhone and Android App Stores
